What the Warning Lights mean.

If any of the warning lights appear when driving, a fault is indicated. Follow the suggested procedures.

Exhaust Temperature Warning Light:

The light appears when the temperature of the catalytic converter is abnormally high.

- If it appears, stop driving. As there may be a lot of heat under the vehicle, park where there are no flammable materials such as grass. Stop the engine and allow it to cool.
 - Have the vehicle checked.

Brake Warning Light:

The light appears when:

Parking brake is applied.

Brake fluid is low.

Vacuum pressure of the braking system is low (diesel vehicle only).

- Have any faults fixed.

Battery Warning Light:

The light appears when there is a fault in the battery charging system.

- If it appears, have this checked.

Oil Pressure Warning Light:

The light appears when there is abnormal pressure of the engine lubricating oil.

- If it appears, stop driving and have this checked.

Seat Belt Warning Light:

The light appears when the driver's seat belt is not fastened.

- Fasten the seat belt.

Door Ajar Warning Light:

The light appears when any of the doors are not properly closed.

- Stop and check each door is closed, until the light goes out.

ABS Warning Light:

(Not on all vehicles.)

The light appears when there is a fault in the Antilock Braking System.

- Have the system checked and repaired.

SRS Air Bag Warning Light:

(Not on all vehicles.)

The light appears or flashes when there is a fault in the air bag system.

- Have the system checked and repaired.

Automatic Rooftop Opening Warning Light:

(Not on all vehicles.)

The light appears when:

Operating the rooftop tent.

Rooftop is not closed properly and handbrake is released.

Rooftop opening is open when driving.

- Check the rooftop is either completely open or closed.
 - Check the handbrake is applied.
- If driving, stop driving and close the rooftop fully.

Scavenging Fan Warning Light (Petrol vehicle):

(Not on all vehicles.)

The light appears when there is a fault in the scavenging fan operation.

- Stop driving and have the fault fixed.

Scavenging Fan Warning Light (Diesel vehicle):

(Not on all vehicles.)

The light appears when there is a fault in the scavenging fan operation.

- Stop driving and have the fault fixed.

Sedimentation Water Tank Level (Diesel vehicle):

The light appears when the water level in the fuel sedimentation tank exceeds the limit.

- The tank needs to be emptied.

DISPLAY LIGHTS:

Headlight High Beam Light:

The light appears when the headlights are on high/main beam.

Indicator and Hazard Lights:

The light will flash when the indicators or hazard lights are used.

Hold Light (Automatic vehicle only):

The light will appear when the 'hold' function is used.

Preheating (Glowplug) Display Light (Diesel vehicle only):

The light appears when the Glowplugs are heating, to assist with engine start-up.

Engine should be started when it goes out.

- It can also appear when fuse no. 1 fails, and you will also notice that the radio is not working.

Rear Window Defogging Light:

The light appears when the rear window defog/demist is operating.
